

Alexander Fulop

Software Engineer

bumpsites@gmail.com • [Linkedin](#) • [bumpsites.com](#)

Career Summary

I build scalable full stack web applications and microservices to integrate with existing systems on the web. Recent work includes developing a platform for legal case management, building microservices to sync client business data across multiple CRM platforms, and creating websites with automated content syndication features for publishing podcasts and video content.

Skills

Experience: 4+ years of Full Stack Web Development

Languages: TypeScript, Go, C#, Node.js

Frameworks: Next.js, React, .NET

Tools: Git, Postman, Ngrok, Docker

AI Tools: MCP, AMP for debugging and code generation

Professional Experience

Unlimited Tech Solutions

Remote, USA

Software Engineer

January 2024 – January 2025

Technologies: NextJS, TypeScript, Node.js, C#

- Designed and built automated microservices for CRM integration, saving clients \$77,000 annually in operations
- Optimized microservice performance for long-term clients:
 - Improved microservice performance by 60% through code refactoring, reducing API calls from 500 to 50 per sync cycle
 - Updated microservice features for new client platforms
- Led team collaboration initiatives:
 - Created company code standards guide
 - Organized weekly development meetings
 - Assisted in discovery for client needs and services
- Mentored junior developer through code reviews, skill development and debugging assistance

Bumpsites

Albuquerque, New Mexico

Owner/Freelance Software Engineer

January 2022 – Present

Technologies: NextJS, TypeScript, .Net, Go, Docker, Ngrok

Contract Engagements:

Revops HQ

July 2025- October 2025

Technologies: NextJS, TypeScript, .Net, Go

- Implemented Model Context Protocol (MCP) servers enabling AI assistants to securely access client databases
- Conducted technical discovery to solve prospective client issues, with solutions leading to 3 successful contract conversions
- Built automated abandoned cart recovery system using Shopify API, increasing client revenue by 30%
- Developed microservices for clients, synchronizing their business data across HubSpot, Magento, and custom CRMs
- Created a legal case management platform with document uploading, court order tracking, and a message system for tracking communication between parties

Core Services:

- Architected and deployed custom websites for small business clients
- Built client podcast websites with automated content syndication via Buzzsprout and YouTube APIs, streamlining audio and video episode publishing
