

Alexander Fulop

Software Engineer

bumpsites@gmail.com • [Linkedin](#) • [bumpsites.com](#)

Career Summary

I build scalable full stack web applications and microservices to integrate with existing systems on the web. Recent work includes developing a platform for legal case management, building microservices to sync client business data across multiple CRM platforms, and creating websites with automated content syndication features for publishing podcasts and video content.

Skills

Experience: 4+ years of Full Stack Web Development

Languages: TypeScript, Go, C#, Node.js

Frameworks: Next.js, React, .NET

Tools: Git, Postman, Ngrok, Docker

AI Tools: MCP, AMP for debugging and code generation

Professional Experience

Unlimited Tech Solutions

Remote, USA

Software Engineer

January 2024 – January 2025

Technologies: NextJS, TypeScript, Node.js, C#

- Built automated microservices for CRM integrations saving clients \$77,000 annually in operations by syncing their business data across several platforms
- Improved existing microservice performance by 60% through code refactoring, lowering API calls for CRM integrations to avoid rate limits and service bottlenecks
- Updated microservice features for client's new CRM services to preserve their functionality
- Led team collaboration initiatives to improve internal developer experience:
 - Created company code standards documentation
 - Organized weekly developer meetings
 - Assisted in discovery for client issues and integration bugs
- Mentored junior developer through code reviews, skill development and debugging assistance

Bumpsites

Albuquerque, New Mexico

Owner/Freelance Software Engineer

January 2022 – Present

Technologies: NextJS, TypeScript, .Net, Go, Docker, Ngrok

Contract Engagements:

Revops HQ

July 2025- October 2025

Technologies: NextJS, TypeScript, .Net, Go

- Implemented Model Context Protocol (MCP) servers enabling Claude to securely access client databases and provide assistance to client employees
- Conducted technical discovery to solve prospective client CRM integration issues with solutions leading to 3 successful contract conversions
- Built an automated abandoned cart recovery system using the Shopify API, increasing client order recovery by 30%
- Developed microservices for clients, synchronizing their business data across HubSpot, Magento, and custom CRMs
- Created a legal case management platform with document uploading, court order tracking, and a message system for tracking communication between parties

Core Services:

- Architected and deployed custom websites for small business clients improving their web presence and customer outreach
- Built client websites with automated content syndication via the Buzzsprout and YouTube APIs, streamlining podcast audio and video episode publishing
