CAREER SUMMARY

- A Full Stack Web Developer with 4+ years of experience building scalable web applications and microservices using TypeScript, Go, and C#.
- Experienced in specialized platforms for legal case management, creating automated websites for podcast/video content syndication, and engineering microservices to integrate and sync business data across multiple CRM platforms.
- Experience with modern frameworks including Next.js, React, and .NET, using tools such as Docker and Git for robust development workflows.

EXPERIENCE

Unlimited Tech Solutions

January 2024 – January 2025

Software Engineer

Remote, USA

Technologies: NextJS, TypeScript, Node.js, C#

- Built automated microservices for CRM integrations saving clients \$77,000 annually in operations by syncing their business data across several platforms
- Improved existing microservice performance by 60% through code refactoring, lowering API calls for CRM integrations to avoid rate limits and service bottlenecking
- Updated microservice features for client's new CRM services to preserve their functionality
- Led team collaboration initiatives to improve internal developer experience:
 - Created company code standards documentation
 - Organized weekly developer meetings
 - Assisted in discovery for client issues and integration bugs
- Mentored junior developer through code reviews, skill development and debugging assistance

Bumpsites

January 2022 – Present

Owner/Freelance Software Developer

Albuquerque, New Mexico

Technologies: NextJS, TypeScript, Go

Contract Engagements:

Revops HQ

July 2025- October 2025

Contract Software Engineer

Remote, USA

- Implemented Model Context Protocol (MCP) servers enabling Claude to securely access client databases and provide assistance to client employees
- Conducted technical discovery to solve prospective client CRM integration issues with solutions leading to 3 successful contract conversions
- Built an automated abandoned cart recovery system using the Shopify API, increasing client order recovery by 30%
- Developed microservices for clients, synchronizing their business data across HubSpot, Magento, and custom made CRMs
- Created a legal case management platform with document uploading, court order tracking, and a message system for tracking communication between parties

Core Services:

- Architected and deployed custom websites for small business clients improving their web presence and customer outreach
- Built client websites with automated content syndication via the Buzzsprout and YouTube APIs, streamlining podcast audio and video episode publishing
