Alexander Fulop

Software Engineer

bumpsites@gmail.com • [Linkedin](#) • [bumpsites.com](#)

Career Summary

I build scalable full stack web applications and microservices to integrate with existing systems on the web. Recent work includes developing a platform for legal case management, building microservices to sync client business data across multiple CRM platforms, and creating websites with automated content syndication features for publishing podcasts and video content.

Skills

Experience: 4+ years of Full Stack Web Development
Languages: TypeScript, Go, C#, Node.js
Frameworks: Next.js, React, .NET
Tools: Git, Postman, Ngrok, Docker
AI Tools: MCP, AMP for debugging and code generation

Professional Experience

Unlimited Tech Solutions   Remote, USA

Software Engineer   January 2024 – January 2025
Technologies: NextJS, TypeScript, Node.js, C#

- Designed and built automated microservices for CRM integration, saving clients $77,000 annually in operations
- Optimized microservice performance for long-term clients:
    - Improved microservice performance by 60% through code refactoring, reducing API calls from 500 to 50 per sync cycle
    - Updated microservice features for new client platforms
- Led team collaboration initiatives:
    - Created company code standards guide
    - Organized weekly development meetings
    - Assisted in discovery for client needs and services
- Mentored junior developer through code reviews, skill development and debugging assistance

Bumpsites   Albuquerque, New Mexico

Owner/Freelance Software Engineer   January 2022 – Present
Technologies: NextJS, TypeScript, .Net, Go, Docker, Ngrok

Contract Engagements:
    Revops HQ   July 2025- October 2025
    Technologies: NextJS, TypeScript, .Net, Go

- Implemented Model Context Protocol (MCP) servers enabling AI assistants to securely access client databases, demonstrating expertise in emerging AI integration patterns
- Conducted technical discovery for prospective clients, with solutions leading to 3 successful contract conversions
- Built automated abandoned cart recovery system using Shopify API, increasing client revenue by 30%
- Developed microservices synchronizing business data across HubSpot, Magento, and custom CRMs
- Created case management MVP with document uploading, court order tracking, and a message system for tracking communication between parties

Core Services:
- Architected and deployed custom web applications for small business clients
- Built podcast websites with automated content syndication via Buzzsprout and YouTube APIs, streamlining multi-format episode publishing
